

## **Ethics in telerehabilitation (1 cr)**

The aim of this Mooc is that students will know what kind of ethical problems are involved in Telerehabilitation and they can pay attention to them when planning, implementing and evaluating telerehabilitation.

Content of the Mooc is:

- identification of ethical viewpoints
- identification of ethical issues and related decision making in telerehabilitation

Mooc is planned for all students and employees in social and health care who are interested in ethical issues in telerehabilitation. The course is created in Sote-Peda 24/7 project during 2018-2020.

To accomplish this course you have to pass all the questions and assignments. Further instructions are included in the assignment.

This is a 1 cr course which means 27 hours of work.

Evaluation: passed/failed
